PROFESSIONAL SUMMARY

IT Consultant with 2 years of experience across financial services and nonprofit environments, specializing in Identity & Access Management, endpoint security, and cloud operations. Supports global user bases spanning the Americas, EMEA, and APAC — from trading floor staff to C-suite executives — delivering L1 & L2 support, managing full identity and hardware lifecycles, and maintaining operations in fast-paced, high-pressure environments

TECHNICAL SKILLS

- **Identity & Access Management:** Okta, Azure/Entra ID, Active Directory, Group Policy (GPO), MFA/SSO Implementation
- **Cloud & Infrastructure:** Azure (Intune, EntraID, M365, Exchange), SharePoint, Egnite, Office 365, Exclaimer
- **Endpoint & Device Management:** Intune MDM, IBM MaaS360, IGEL UMS, Citrix, Dell Tech Direct, Team Viewer
- **Security Tools & Platforms:** Microsoft Defender, Darktrace, CrowdStrike Falcon, Abnormal AI, KnowBe4, Tenable Nessus
- **Security Operations:** Log analysis, threat detection, phishing simulation, email security administration, patch management
- **Scripting & Automation:** PowerShell, Python, Bash, SQL queries
- **Ticketing & ITSM:** Jira Atlassian, Outlook, Teams, Slack, IT Service Management workflows
- **A/V & Conferencing:** Zoom, Poly, Logitech
- **Password Managers:** 1Password, Last Pass, Google Password Manager
- **Operating Systems:** Windows 11 Enterprise, Windows Server, Android, Linux (Kali, Ubuntu), Chrome OS

WORK EXPERIENCE

Gotham Technology Group

IT Consultant

08/2025 – Present

Manhattan, NYC

- Administer Active Directory Domain Services (AD DS) and Intune MDM for a global financial services firm across the Americas, EMEA, and APAC, managing OUs, security groups, application groups, distribution lists, GPOs, and storage access provisioning.
- Oversee Microsoft 365 and Entra ID environments, managing Exchange Online, user licensing, mailbox configurations, conditional access policies, and cloud identity operations across a global tenant.
- Manage Okta IAM operations including access permissions, account lifecycle, and authenticator management; analyze activity logs to troubleshoot and resolve authentication issues.
- Oversee the full identity and hardware lifecycle — provisioning, modifying, and deprovisioning user accounts, devices, and peripherals in alignment with onboarding, role changes, and departures.
- Manage AI platform evaluation and deployment, overseeing licensing, SSO integration, add-in configuration, and usage monitoring across multiple vendors.
- Administer virtual desktop environments, managing user sessions, optimizing resources, and resolving connectivity issues to ensure consistent and reliable access.
- Support financial data terminal and portfolio reporting platforms used by traders and analysts, coordinating with vendor support for issue resolution and maintaining uninterrupted market data access.
- Collaborate with security engineers to embed security controls into laptops, applications, and system designs; conduct pre-deployment testing of weekly security patches, distribute approved updates company-wide, and remediate software vulnerable to zero-day exploits.
- Manage enterprise email security operations, investigating flagged emails, enforcing phishing controls, maintaining safe sender lists, whitelisting approved domains, and releasing quarantined messages to ensure reliable mail flow.
- Manage Endpoint Detection and Response (EDR) operations using an enterprise platform, maintaining sensor updates, investigating alerts, and coordinating with the security team for threat remediation.
- Assist in designing and managing phishing simulation campaigns to train users on identifying and reporting threats, strengthening organization-wide security awareness.
- Serve as the first point of contact for white-glove L1 & L2 IT support across in-office and remote users, including C-suite executives and trading floor staff, maintaining high first-contact resolution rates and minimizing downtime.

- Provide hands-on support for conference room A/V environments, ensuring consistent readiness across C-suite meetings, executive presentations, training rooms, and company-wide headquarters events.
- Create and maintain IT knowledge bases documenting recurring issues, runbooks, and SOPs to reduce resolution time, accelerate onboarding of incoming IT staff, and provide guidance for current users.

Center For Justice Innovation

11/2024 – 03/2025

Technical Support Analyst

Manhattan, NYC

- Administered Active Directory and MDM for 900+ users across 6 locations, managing user accounts, group policies, security groups, and device compliance.
- Provided Level 1-2 helpdesk support via Jira for users onsite at headquarters, across 6 locations, and remotely, resolving hardware, software, and connectivity issues.
- Deployed, configured, and decommissioned laptops, desktops, and mobile devices, delivering full workstation setups—including monitors, docking stations, peripherals, and printers—across multiple offices throughout all four boroughs.
- Traveled to branch offices to deploy and configure IT hardware and train staff, streamlining onboarding for new hires.
- Configured and supported conference room A/V systems, and camera setups to enable reliable hybrid collaboration across teams.

Moore Capital Management

05/2024 – 08/2024

Information Technology Intern

Manhattan, NYC

- Provided Level 1 support to the trading floor, minimizing downtime during peak market hours.
- Collaborated with Senior Security Engineer to implement DLP USB device control solutions, integrating user lifecycle processes with endpoint security measures to protect sensitive trading floor data.
- Built and deployed 150+ user workstations with full desk setups, including monitors, docking stations, and desktop VoIP phones.
- Resolved end user issues via the ticketing system, delivering timely technical support to 300+ employees.
- Configured and maintained Zoom conference rooms enterprise-wide, including Logitech camera setup and integration.
- Developed a comprehensive company-wide application inventory sheet, driving timely updates, batch processing, and decommissioning of obsolete applications.

EDUCATION

John Jay College of Criminal Justice

Graduated May 2025

Bachelor of Science in Computer Science and Information Security

Manhattan, NYC

- GPA: 3.92/4.00 (Summa Cum Laude)
- Coursework: Computer Networking, Advanced Algorithms, Cryptography, Data Structures, Computer Security, Programming Languages, Capstones 1 & 2 in Cybersecurity.

IT TRAINING & PROJECTS

- Built a Compact Virtual Home Lab for a Small Enterprise, integrating a Microsoft Server 2017, Active Directory, group policies, and Windows 10, and implemented multi-platform security across Windows and Linux environments.
- Developed a program in Python for encrypting and decrypting documents securely using RSA encryption technique.
- Created and deployed a Honeypot using T-Pot, leveraging Azure cloud hosting for configuration and implementation.
- Deployed Snort IDS on Kali Linux, analyzed attacks using PCAP files, and documented findings for threat assessment.
