PROFESSIONAL SUMMARY

IT professional supporting a global asset management firm with 300+ users across the Americas, EMEA, and APAC, specializing in Identity & Access Management, endpoint security, and cloud operations. B.S. in Computer Science & Information Security (summa cum laude, 3.92 GPA). Hands-on owner of Okta, Entra ID, Active Directory, and Intune environments, with experience administering EDR platforms, conditional access policies, and SaaS provisioning at enterprise scale.

TECHNICAL SKILLS

Identity & Access Management: Okta, Microsoft Entra ID, Active Directory, Group Policy (GPO), MFA/SSO Implementation, SAML, SCIM provisioning, User Lifecycle Management

Cloud & Infrastructure: Microsoft Azure, Microsoft 365, Exchange Online, SharePoint, Office 365, Egnite, Dell TechDirect

Endpoint & Device Management: Intune (MDM/MAM, Win32 app packaging, Autopilot), IBM MaaS360, IGEL, Citrix, TeamViewer

Security Tools & Platforms: Microsoft Defender, CrowdStrike Falcon, Darktrace, Abnormal AI, KnowBe4, Tenable Nessus

Security Operations: EDR administration, Email security & Phishing controls, Vulnerability remediation, Patch management, Incident response, Security awareness training, Log review

Ticketing & ITSM: Jira Service Management, ITIL-aligned workflows, runbook and SOP development, Microsoft Teams, Slack

Operating Systems: Windows 11 Enterprise, Windows Server, Linux (Ubuntu, Kali), MacOS, ChromeOS, Android, iOS

Scripting & Automation: PowerShell, Python, Bash, SQL

A/V & Conferencing: Zoom, Poly, Logitech

Password Managers: 1Password, Last Pass

WORK EXPERIENCE

Gotham Technology Group — client: Muzinich & Co

08/2025 – Present

IT Consultant

Manhattan, NYC

- Administer Active Directory, Entra ID, and Microsoft 365 for 300+ users across the Americas, EMEA, and APAC, managing OUs, security and distribution groups, GPOs, mailboxes, licensing, and storage provisioning across a global tenant.
- Oversee Microsoft 365 and Entra ID environments, managing Exchange Online, user licensing, mailbox configurations, conditional access policies, and cloud identity operations across a global tenant.
- Manage Okta IAM operations including access permissions, account lifecycle, and authenticator management; administer a wide variety of SaaS applications, managing user provisioning and deprovisioning across platforms.
- Execute full onboarding and offboarding workflows covering identity, application access, and hardware lifecycle, reducing provisioning delays and enforcing least-privilege access on day one.
- Researched and deployed a centralized endpoint management portal across the device fleet to consolidate log collection, hardware diagnostics, and driver update enforcement; coordinated with vendor support for SSO implementation and enterprise-wide rollout, and provisioned admin accounts for all IT team members.
- Package and deploy enterprise applications via Intune using Win32 app packaging and pre-deployment configuration, ensuring consistent software delivery across the device fleet.
- Administer enterprise admin accounts across multiple AI platforms, overseeing licensing, SSO integration, add-in configuration, and usage monitoring.
- Participate in a rotating on-call schedule to provide after-hours remote support, track and manage tickets, and assist with vulnerability remediation and incident response in accordance with company protocols and escalation procedures.
- Collaborate with security engineers to embed security controls into endpoints, applications, and system designs; conduct pre-deployment testing of weekly security patches, distribute approved updates company-wide, and remediate software vulnerable to zero-day exploits.
- Manage Endpoint Detection and Response (EDR) operations, maintaining sensor updates, investigating alerts, and coordinating with the security team for threat remediation.
- Administer enterprise email security operations including phishing controls, safe sender list maintenance, domain whitelisting, and quarantine management to ensure reliable mail flow.

- Manage phishing simulation campaigns to train users on identifying and reporting threats, strengthening security awareness.
- Support Bloomberg Terminal and portfolio reporting platforms for trading floor staff, coordinating with vendor support for issue resolution and maintaining uninterrupted market data access.
- Serve as the primary point of contact for white-glove L1 & L2 IT support via Jira for in-office and remote users, including C-suite executives and trading floor staff, maintaining 90% first-contact resolution rates and minimizing downtime.
- Administer virtual desktop environments, managing user sessions, optimizing resources, and resolving connectivity issues to ensure consistent and reliable access.
- Provide hands-on support for conference room A/V environments, ensuring readiness across C-suite meetings, executive presentations, training sessions, and company-wide events.
- Author and maintain IT knowledge bases — including runbooks and SOPs — to reduce resolution time, accelerate IT staff onboarding, and support end-user guidance.

Center For Justice Innovation

11/2024 – 03/2025

Technical Support Analyst

Manhattan, NYC

- Administered Active Directory and MDM for 900+ users across 6 locations, managing user accounts, group policies, security groups, and device compliance.
- Provided Level 1-2 helpdesk support via Jira for users onsite at headquarters, across 6 locations, and remotely, resolving hardware, software, and connectivity issues.
- Deployed, configured, and decommissioned laptops, desktops, and mobile devices, delivering full workstation setups—including monitors, docking stations, peripherals, and printers —across multiple offices throughout all four boroughs.
- Traveled to branch offices to deploy and configure IT hardware and train staff, streamlining onboarding for new hires.
- Configured and supported conference room A/V systems, and camera setups to enable reliable hybrid collaboration across teams.

Moore Capital Management

05/2024 – 08/2024

Information Technology Intern

Manhattan, NYC

- Resolved Level 1 end-user issues via Jira ticketing and Outlook, delivering timely technical support to 300+ employees on the trading floor while minimizing downtime during peak market hours.
- Collaborated with Senior Security Engineer to implement DLP USB device control solutions, integrating user lifecycle processes with endpoint security measures to protect sensitive trading floor data.
- Built and deployed 150+ user workstations with full desk setups, including monitors, docking stations, and desktop VoIP phones.
- Configured and maintained Zoom conference rooms enterprise-wide, including Logitech camera setup and integration.
- Developed a comprehensive company-wide application inventory sheet, driving timely updates, batch processing, and decommissioning of obsolete applications.

EDUCATION

John Jay College of Criminal Justice

Graduated May 2025

BS in Computer Science and Information - Summa Cum Laude, GPA 3.92/4.00

Manhattan, NYC

- Relevant coursework: Computer Networking, Cryptography, Computer Security, Data Structures, Advanced Algorithms, Programming Languages, Cybersecurity Capstones I & II.

IT TRAINING & PROJECTS

- Built a virtual home lab for a small enterprise scenario, integrating Windows Server, Active Directory, Group Policy, and Windows 10 endpoints to simulate identity management and policy enforcement.
- Deployed a T-Pot honeypot on Microsoft Azure to capture and analyze attacker behavior against exposed services, reinforcing skills in cloud-hosted threat detection and log review.
